Dribbble Search (Fully matched search)

The screenshot shows a search interface with a dark header bar containing two tabs: 'Gallery' (with a leaf icon) and 'Dribbble' (with a globe icon). Below the header, the 'Gallery' tab is active, showing a search form. The form has a title 'Gallery Search' and a text input field containing the query 'Iphone Ecommerce Checkout'. To the right of the input field is a dark 'SEARCH' button. Below the input field, there are five filter options, each with an unchecked checkbox: 'platform', 'color', 'app', 'screen_function', and 'screen_layout'. Annotations with arrows point to the 'Gallery' tab, the search input field, and the filter options.

Split in category

Note

- We apply maximum 32 images for each category in splitting approach
- We random shuffle the results, so the top 32 might change
- Our Dribbble search is based on fully matched on tags. The results might different to real Dribbble one, this is because real Dribbble search is based on tags + title.

Note

- Database Crawl Query
 - iphone+ecommerce+checkout
 - mobile+travel+list
 - website+blue+landing
 - ios+finance+chart
 - web+signup+form
- We filter the non ui images
